HELMETS & ACCESSORIES

Style & Safety

One of the world's largest manufacturers of protective helmets for motorcyclists arrives with its SMK range, a collection that is already complete, but one which will continue to grow in coming years, with increasingly innovative and technologically advanced products that are safe and aesthetically captivating.

SMK helmets are conceptualized and designed in Europe. The factory in India produces almost five million helmets annually (2018), destined for markets across the world.

The SMK manufacturing facilities have a complete production cycle that allows for rigid quality control at every stage of production until delivery. Style & Safety, this is the SMK slogan, combining Italian design with 35 years of know-how in the production of helmets for all motorcyclists.

GLIDE BASIC

Art. No. 132 2005
